

World Development Indicators Report

Regions: Latin America, South Asia, Sub-Saharan Africa | Income Tiers: All Tiers | Analytics & Deep Learning Integrated Report

1. Income Group Distribution (Pie)

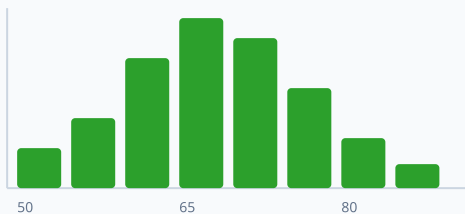

Income Group Distribution

This pie chart breaks down the proportional ratio of evaluated nations classified under standard World Bank income brackets within selected territories.

Type: Pie Chart

2. Life Expectancy Frequency (Hist)

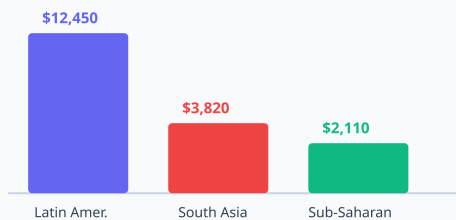

Life Expectancy Frequency

A statistical histogram illustrating the frequency distribution density and variance of global average life expectancy figures across sovereign states.

Type: Histogram

3. Mean GDP per Capita by Region (Bar)

Mean GDP by Region

Highlights regional macroeconomic disparities by calculating the arithmetic mean Gross Domestic Product (GDP) per capita across regional blocs.

Type: Bar Chart

4. Top Ranking Countries (Barh)

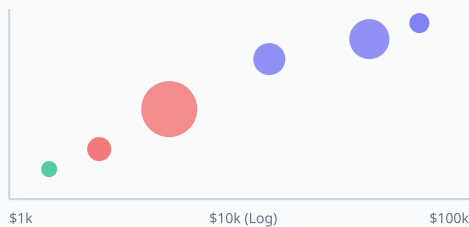

Top Country Performance

Horizontal ranking bar plot isolating leading entities based on target development parameters, allowing clean comparative evaluation.

Type: Horizontal Bar (Barh)

5. GDP vs. Life Expectancy (Scatter)

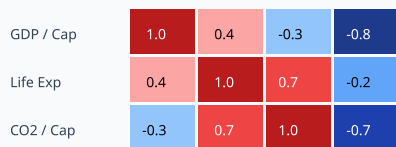

GDP vs. Life Expectancy

Logarithmic scatter plot displaying empirical health outcome metrics plotted against income per capita, scaled by total population.

Type: Scatter Plot

6. Indicator Correlation Matrix (Heatmap)

Feature Correlation Matrix

A color-encoded correlation heatmap displaying linear Pearson correlation coefficients between macroeconomic and development features.

Type: Heatmap

7. Global Distribution Map (Map)

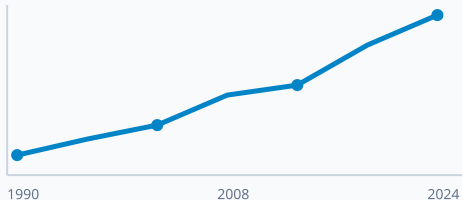

Geospatial World Map

A choropleth map plotting national performance metrics across international borders to highlight geographic cluster dynamics.

Type: Choropleth Map

8. Historical GDP Trend (Line)

Historical Trend Analysis

Line chart demonstrating longitudinal time-series progression of GDP per capita, revealing macro economic trajectory and growth stability.

Type: Line Chart

9. CO2 Emissions Spread (Boxplot)

Carbon Footprint Variance

A boxplot displaying medians, interquartile ranges (IQR), and extreme outlier records for CO2 emissions across income tiers.

Type: Boxplot

PyTorch Deep Learning Neural Network Feature Summary

Model Architecture
Deep MLP (3-Layer)

Validation R²
0.892

Training Convergence
0.0124 MSE
